

## **Module CSU22041- Information Management 1**

**Academic year 2022/23**

### **Week 3<sup>rd</sup> October 2022 Group Formation, preparation for UML presentation.**

The rationale for the online group work this week is to give you an opportunity to form your group and to apply what has been covered in class to your group project specifically focusing on preparation for your assignment submissions.

Each group is expected to work using their blackboard groups during the allocated times shown below.

16:00-18:00 on Monday 3<sup>rd</sup> October (All groups).  
10:00-11:00 on Tuesday 4<sup>th</sup> October (Groups 2-15)  
14:00-15:00 on Friday 7<sup>th</sup> October (Groups 16- 29)  
15:00-16:00 on Friday 7<sup>th</sup> October (Groups 30-37 and Group 1)

The lecturer or teaching assistants will visit each group during the sessions to answer any questions and to provide clarification.

For the session on Monday 3<sup>rd</sup> October the lecturer and TAs will be checking with you that

- All members of the group have been contacted.
- You have taken note of the assignment details.
- You are aware of the domain allocated to you. If you have changed your domain, we will check that the full group are ok with the change.
- You have chosen software for drawing the UML diagrams and checked that the diagrams can be exported to your chosen word processor.
- The group has begun to choose the diagram for their presentation (either Use case, Activity, Class, or ethics canvas)

For the sessions on Tuesday 4<sup>th</sup> October and Friday 7<sup>th</sup> October the lecturer and TAs will be available to discuss with you the work you have done to date.

In addition to the lecture slides, some documents you may find useful are

- The assignment sheet
- The link to submission of assignment which contains instructions and an indicative rubric
- The group and domain listings
